

# CEDAR

## Engineering note

1 October 2016

### **CEDAR HSP dongles on OS X 10.12 (macOS Sierra)**

When introducing OS X 10.12 (macOS Sierra), Apple introduced some issues for software developers. Currently, CEDAR Studio will not run on Sierra so, if you upgrade an existing system to this, or install CEDAR Studio on this, you will obtain an HSP dongle security error and the software will not function.

CEDAR Audio is working with its partners to overcome this as quickly as possible.

Windows/PC users are not affected.

For further information on either of these issues, please contact [support@cedaraudio.com](mailto:support@cedaraudio.com).
